

POST PROCEDURE INSTRUCTIONS

*Please note your brows will appear 40% bolder for the first week until they heal. When you shed this bold layer they will end up fine hair-like lines. It may seem spotty for a day during this shed process and it will appear as if you have lost all pigment, you haven't. Call to make touchup appt once this process is finished.

*Apply A&D ointment sparingly to treated area, twice daily for 7 days.

*Apply A&D ointment on to treated area before showering or washing face. Do not use soaps or facial cleansers on treated area for 7 days.

*Do not rub or pick at treated area, allow it to flake off on its own. This process is usually around 4-8 days after procedure day and only lasts about 1-2 days. There should be absolutely no scrubbing, facial cleansers or chemicals on the treated area for at least 7 days or until completely healed.

*Do not soak treated area in a bath, swimming pool, or hot tub for two weeks following your procedure.

*Do not swim in fresh, salt, or chlorinated water for 7 days after your procedure.

After 7 days gently rinse treated area with a mild anti bacterial soap. Usually an orange soap like Dial. Rinse with water and gently pat the area dry.

To prevent fading to treated area it is recommended to apply a gentle sunscreen with an SPF factor of at least 30 to treated area any time you will be in the sun or tanning bed. (Wait at least 1 week after your procedure)

You will not be allowed to donate blood for 1 calendar year following your procedure, per guidelines of the American Red Cross.

Failure to follow post procedure instructions may result in loss of pigment, discoloration, or infection. Remember that the colors will appear brighter immediately following the procedure and will soften as the healing process occurs. A touch up procedure will be necessary within 1st 6 weeks, so please call and schedule an appointment. Post procedure follow up cannot be performed before 4 weeks.
